Sunday, 27 March 2011 20:02 - Last Updated Sunday, 27 March 2011 20:26

Mr. Madonia is pictured here setting up our new weather station on top of the school -- made possible with some gift money from generous benefactors. The weather station collects data on temperature, humidity, wind gusts, wind direction, and total rainfall. Soon, the current readings will be available on our website and on Weather Bug. As a result, someday our school's weather station might even get mentioned on a local television station's weather forecast!
